## How to complete a SEAS Fax Referral Form

To protect client information, a SEAS Fax Referral **must be faxed to 360-676-6729**. Do not submit it electronically through email.

Initial the top box to let SEAS navigators know the parent/guardian consented to the referral. This is required.

Include all the demographic information listed in the boxes. This is required.

Check off what concerns you or the family have for the child.

Let SEAS know if the child has been evaluated for the concerns you checked off.

Let SEAS know if there is a specific services or resource you would like us to talk to the family about or refer them to.

GIDES and clinic-based outpatient specialty therapies require a PCP referral.

Check off what you are referring to (GIDES and/or clinic - specify therapy type).

Sign the form.

Include visit notes, ASQ, MCHAT, and/or other equivalent screening results.

### Helpful tips:

- Double check that the child's name, parent's name, and contact are correct.
- Make sure to include the language if the client needs an interpreter.
- Section three must be filled out by the child's medical provider to refer to GIDES or clinic-based outpatient specialty therapy (OT, PT, SLP, etc.).
- A note to medical providers: always include notes from the most recent WCC or visit related to the concern(s). Please include the ASQ, MCHAT, or other screening if you are referring to an evaluation like GIDES or ESIT.
- It's always helpful to include information about the family, or your concerns. Use the notes page to write in additional information as needed. More information helps navigators to prepare for the conversation with the family.
